

Defense Technology Cluster (DTC) Vision, Mission and Membership

Mission:

To accelerate the growth and success of existing Defense Technology firms, and to support the growth of new DT firms in the San Antonio region.

The Defense Technology Cluster (DTC) will serve as the primary source for leveraging information, assets and resources to provide solutions for Department of Defense, Homeland Security, and other defense related requirements and for facilitating the transfer of those solutions to the commercial markets. The DTC will also create awareness within defense related government organizations of the technical capabilities available in the San Antonio region for defense and technology entities and to promote the generation of revenue for these companies and the creation of jobs within the region.

Vision:

To create a cooperative and collaborative broad based, active and meaningful environment to foster the creation, recognition, growth, and support of DTC companies amongst San Antonio's business, government, academic and community resources.

The Defense Technology Cluster seeks to become the recognized source for information and resources on the talent and capabilities of firms in the greater San Antonio area available to support defense technology requirements (including military operations and sustainment) and for fostering collaboration to create jobs and wealth for the region.

Membership:

Membership in the DTC shall consist of representatives from Defense, Homeland Security and IT Technology related firms who value collaborative efforts to further the growth of the Defense Technology sector of San Antonio's economy. Additionally, governmental, academic and non-governmental entities with vested interests in the defense technology area will be invited to join.

Goals:

- Proactively attract defense technology work to the San Antonio region.
- To provide a conduit of information concerning capabilities to interested entities.
- Create an awareness within defense related government organizations of the technical capabilities available in the San Antonio region
- Revenue Generation for DT related Companies in San Antonio
- To be the "one stop shop" for DT Solutions utilizing San Antonio resources
