

DTC Capabilities

<i>Business Name</i>	<i>Point Of Contact</i>	<i>Goods and Services</i>
Abacus Solutions Group LLC	Chris Koehn chris.koehn@abacussg.com	Abacus Solutions Group is a veteran owned small business that provides enterprise class technology systems design, planning, integration, D&R, management and administration. ASG successfully helps clients with consulting and professional services to include; project management, custom development, database development and administration for government and commercial applications.
Abbott Consulting	Gary "Bud" Abbott abbottt@satx.rr.com	Strategic planning for technology programs, Concept development and requirements analysis, Risk identification/analysis/mitigation, Test and Evaluation, Consulting, Facilitation, Program Integration, Project management
Adolos Strategic	Danny J. Sharon adolos@sbcglobal.net	Small, veteran-owned consultancy offering 30 years experience in Systems Engineering, Software Engineering, Knowledge Management, Statistical and Non-statistical Modeling and Analysis, Business Development and Planning
Aldec, Inc.	Efrem B. Muchin efremm@aldec.com	Digital Hardware Design Verification Tools - Simulation, implementation, testing and debugging of ASICs/FPGAs. IP Cores. Training - VHDL, Verilog, SystemC, Synthesis, SystemC, SystemVerilog, assertion languages (OVA/PSL/SVA).
Apex Software	Anne M. Thompson athompson@apexwin.com	Apex sketching and area calculation software is the premier sketching software for the real estate valuation market. Apex is currently developing solutions for the Emergency First Response market leveraging its core products.
AT&T	Adam Cavazos III ac5359@att.com	AT&T has IP-based and wireless network capabilities, enabling AT&T to deliver services and integrate voice, data and video communications. AT&T serves government customers and millions of small and large customers around the globe.
Bexar County (Economic Development Office)	David Marquez dmarquez@bexar.org	County Government
Bexar County (Economic Development Office)	Kara Hill khill@bexar.org	County Government
Blackhawk Management Corporation	Lee Witherow witherowl@blackhawkmgmt.com	Engineering and Technical support services relating to Information Technology, Intelligence, Network Administration, PKI and Program Management and Contracts Administration.
CACI International, Inc.	Bob Pollock rpollock@caci.com	CACI International, Inc. provides the IT and network solutions needed to prevail in today's new era of defense, intelligence, and e-government. We deliver IT applications and infrastructures our customers use to improve communications and collaboration, secure the integrity of information systems and networks, enhance data collection and analysis, and increase efficiency and mission effectiveness. Our solutions lead the transformation of defense and intelligence, assure homeland security, enhance decision-making, and help government to work smarter, faster and more responsively. CACI's legacy support for Defense engineering and logistics needs has evolved to solutions that bring cutting-edge technology to military logistics, keeping our forces supplied and ready to deploy at any time and any place. We also provide the full range of military logistics and engineering services to keep systems, sub systems, components and commodities viable, supportable, and to insure sources of supply exist and the entire supply chain reacts to requirements.

<i>Business Name</i>	<i>Point Of Contact</i>	<i>Goods and Services</i>
City of San Antonio	Ed Davis edavis@sanantonio.gov	Municipality
City of San Antonio	Steve Nivin, PhD snivin@sanantonio.gov	Municipality
Concepts for Creation Technology Innovations, LLC	John Hill john.hill@cfcti.com	CFCTI, LLC is a veteran owned small business that provides information technology integration and professional services. We provide Project Management, Systems Integration, Network Engineering and Administration Services, Infrastructure cabling, Inside plant cabling, Web Application and Web Site Development and Hosting, Database Development and Hosting Services, Technical Writing and software support to government and commercial customers.
Defense Aerospace Industry Support Depot, Inc.	Patricio Elizondo, Jr. patricio@stic.net	Machine Shops, Wire EDM, Plating, Stamping, Heat Treat, Cable & Wire Harness Mfg. & Repair, NDE laboratory, Fabrication, Sheet Metal Mfg., Composites, Training, Program/Project Management, FAR 145 Repair Stations, Modifications, Avionics/Electronics Mfg. & Repair, Engineering Support, Data Management, Business Development, Logistics Sustainment, Rapid Prototyping, Reverse Engineering, MRP/ERP Integration, Electronic Obsolescence & Recycling, Information Technology, Web-Site Development, Video Graphics/Multi-Media, Quality/Management Plan, Development, Tool & Die Mfg.
Del Valle Technologies	Linda Molinar lmolinar@delvalletech.com	Del Valle Technologies is a Minority/Veteran owned small business that specializes in Information Technology solutions. We offer a team of highly qualified professionals to serve you with the highest caliber of Information Technology solutions possible. Del Valle can assess your needs with our capabilities to derive the exact results you demand and deserve. We pride ourselves on delivering only the best in service and solutions. Capabilities include: <ul style="list-style-type: none"> • Web-Based Courseware (Learning Management System) • Web Applications (Inter/Intranet) • Web Development (Corporate/Personal) • Information Technology Support
Denim Group, Ltd.	John B. Dickson john@denimgroup.com	Secure application systems development and web-based technologies
Diligent Consulting, Inc.	Roger Williams rogerw@diligent-us.com	Info Mgmt IT services and solutions. Oracle/Java, custom application development, business/web application system development, database and system administration, ERP support, and data warehousing solutions.

<i>Business Name</i>	<i>Point Of Contact</i>	<i>Goods and Services</i>
dNovus RDI	Charlie Hall chall@dnovus.com	dNovus RDI is a 16-year-old, small, woman-owned, San Antonio-based business with offices in Austin TX, Neosho MO, Atlanta GA, Niceville FL, Langley AFB VA, and Washington, DC. dNovus provides services to government and military customers in the following areas: IT Applications, (Application Development and Implementation, Web Services, Integration of Enterprise Applications & Information Services, Government ERP Systems Development); Business Services (Customer Business Processes and Organizational Services, such as Help Desk, Seat Management, BPR, and Management Support); Information Assurance (Certification & Accreditation, Red / Blue Team Vulnerability Testing, IA Focused Training, Cyber Forensics Support, Security Technology Evaluations, IA Architecture Design & Development for the Enterprise, IA Compliance Audits); Intelligence Operations (Analysis, Concept Development Consulting, Information Handling, Operations & Operations Support, ISR Architectures & Solutions) and Systems Engineering (Systems Design & Engineering, Change Management, Back Office Services (Data & Asset Management Integration of Application Operations), and support to Cost of Aging Aircraft initiatives (Aerospace Qualified Electronics Components and the Community of Practice).
Engineering Spectrum, Incorporated	Peter Kotara pkotara@espectrum.com	Since 1992, Esi has provided a wide array of engineering services for Government and Industry. Esi's capabilities include, but are not limited to technology insertion, IV&V services, circuit card repair, TPS development, automation & robotics, any aspect of automatic test equipment, business case analysis, various engineering studies.
Frontline Systems, Inc.	Bob Sanchez bsanchez@front-line.com	Frontline Systems, Inc. is an advanced technology firm that provides advanced technologies, information systems, learning management systems, program management & support, and logistics services.
Innové LLC	Brad Morrison brad.morrison@innove-us.com	Security Engineering; Secure IT; Security Technologies
Karta Technologies, Inc.	Harpreet Singh harpreet@karta.com	Karta is a high technology consulting company headquartered in San Antonio, TX, providing integrated solutions to problems in Training, Engineering, Logistics and Information Technology. We offer information technology, engineering training and program management services. We specialize in Medical IT, Sustainment Engineering and Logistics, Information Assurance Training, Healthcare Management and Environmental Services.
L-3 Communications / Titan Group	Karl Kabanek karl.kabanek@L-3Com.com	IT and comm. Systems solutions, C4ISR aircraft modernization, logistics, IA, COOP, IO, IW, CAN, CND, training, sensors, program support, engineering and scientific services
Northrop Grumman Information Technology - TASC	Terry Baker t.baker@ngc.com	TASC is a wholly owned subsidiary of Northrop Grumman IT and is one of the world's premier providers of information management and systems engineering solutions. TASC provides critical systems engineering, information management, and integrated systems management skills to our nation's intelligence, information operations & assurance, space, and communications programs and activities.
OnBoard Software, Inc (an MTC Technologies Co.)	Scott Gray sgray@onboard-software.com	Systems Engineering, Software/Hardware Design, Development, Modernization. Avionics, Systems Integration, Testing, Database and Information Management, Information Assurance, Automated Test Systems, Logistics, Web interface, Document management

<i>Business Name</i>	<i>Point Of Contact</i>	<i>Goods and Services</i>
Rockwell Collins	Sam Sutter sjsutter@rockwellcollins.com	Rockwell Collins is a leader in the design, production and support of communications and aviation electronics solutions for government and commercial customers worldwide. Rockwell Collins' Government Systems business supplies defense electronics products and systems, including communication, navigation and integrated systems, for airborne, ground and shipboard applications to the U.S. Department of Defense, foreign militaries and manufacturers of military aircraft and helicopters.
SATAI Network	Kara Sagebiel ksagebiel@satai-network.com	SATAI Network is a technology commercialization center with a single point-of-entry to assist researchers, inventors, entrepreneurs and other companies to turn their innovations into enterprises. Delivery of comprehensive enterprise development services, know-how, and advice benefit the business objectives of those technology-based opportunities seeking support.
Science Applications International Corporation	Suzanne H. Gorden suzanne.h.gorden@saic.com	Sustainment of Aging Aircraft engines & parts; all DoD-related work; Homeland Security; Telecom svcs; Info Technology svcs; Program Design & Development; Database Development; Reliability Centered Maintenance; Outsourcing
Science Logistics Inc.	Clay Mallory cmallory@science-logistics.com	Main business areas are military and consumer electronics repair, with emphasis on obsolete and non OEM supported electronics; information technology services; and advanced logistics life cycle management.
Sense Technologies LLC	Dawn Fulgham dawnf@sensetechnologies.com	Woman-owned company, specializing in electronics design & embedded systems. Engineering & mfg services. FDA registered medical device manufacturer. Interested in digital communications, software defined radios & RF design.
Sierra Nevada Corporation (SNC)	Dave McNeely dave.mcneely@sncorp.com	Systems Integration, Information Technology & Electronic Warfare Engineering & Development, ISR Mission support, Aircraft modification & maintenance. SNC San Antonio is Software Engineering organization specializing in "data to knowledge". Using software engineering, ontologies and intelligent agents, the SNC San Antonio office performs Knowledge Engineering (KE) to facilitate the automation of data fusion and mining. This allows us to imbedded in hardware/software activities that are normally performed by human operators. We have currently completed an ontology of the ELINT domain and have built agents to automate the Raven activities on the Rivet Joint aircraft. This allows the Raven to be "on the loop" vice in the processing loop, gaining efficiencies in software and human performance. AFRL and Big Safari are in the process of incorporating the capability into operational aircraft. SNC's goal is to use this approach to put the "smarts" into the network and achieve the maximum advantage of Net-centricity.
Software Engineering Services	Mark Flanders mflanders@sesc-us.com	Capabilities: Software Engineering Services (SES) is a SBA certified 8(a), SDB, Veteran Owned, Top Secret Classification, Top Secret Facility Classification, assessed at CMMI Maturity Level 3 company specializing in: Program/Project Management, Process Improvement & Workflow Analysis, IT Systems Analysis & Development, Data Warehousing, CMM & CMMI, HIPPA Assessment & Implementation, Software Development & Engineering, Security & Business Continuity, Test & Evaluation, Database Development & Management, QA, Business Re-engineering, Medical, Medicaid & Medicare, Configuration Management (CM)

<i>Business Name</i>	<i>Point Of Contact</i>	<i>Goods and Services</i>
Southwest Research Institute	Harv Watson harvey.watson@swri.org	Research and development services in engineering and physical sciences, including but not limited to Aerospace Electronics and Information Technology; Applied Physics; Automation and Data Systems; Fuels and Lubricants Research; Geosciences and Engineering; Chemistry and Chemical Engineering; Engine Emissions and Vehicle Research; Mechanical and Materials Engineering; Signal Exploitation and Geolocation; Space Science and Engineering; Training, Simulation and Performance Improvement.
SpecPro Inc.	Steve Doneghy sdoneghy@specpro-inc.com	Aerospace equipment performance, integration & test engineering. Specifications & data development. Validation / Verification testing. Logistics support analysis, forecasting & diminishing manufacture source development.
Standard Aero	Kim Newman knewman@standardaero.com	Standard Aero is a major Maintenance, Repair, and Overhaul (MRO) services provider of turbine engines and other aerospace/defense systems. Standard Aero performs MRO services on GE, Rolls-Royce, Honeywell, and Pratt & Whitney Canada engines used in regional airline, business aviation, helicopter, and military/government markets.
Sun Microsystems - DMG (Data Management Group)	Ken Gudenrath ken.gudenrath@sun.com	Industry leading professional solutions offering best practices and integrated solutions for Enterprise and workgroup. Data solutions range from ILM (Information Life Cycle Management), SRM/HSM software solutions, hardware encryption and complete tiered solution offerings. Our platform offerings include Solaris and AMD based servers, Java software Development to enterprise CRM/ERM solutions. We also offer professional services for overall customer architectural analysis to complete design and implementation either directly or via partners.
Team Housing Solutions	Desiree Massey dmassey@teamhousing.com	Team Housing Solutions is a full-service corporate housing company providing temporary furnished apartments for corporations, defense contractors, consultants and military personnel. We specialize in housing teams on temporary project assignment in San Antonio or anywhere in the nation for stays of 90+ days.
